

Artificial General Intelligence - AGI

What is AGI?

IMPORTANT: The AGI Blueprint I created was generated almost entirely with the assistance of an AI language model (ChatGPT).

My sole contributions were visual thought and mnemonic design.

I personally did not develop the code samples, and I have no capability to independently create, operate or deploy AGI systems.

As of September 2025, I am retiring from AGI work permanently.

I have no code nor the ability to code AGI.

There will be no further AGI related updates or uploads.

I will not be discussing AGI as of September 2025.

This site and documents are now kept only for archival and personal record purposes.

They are not intended for development or deployment.

Main Visual Thought AGI website: visualthoughtagi.com

Also known in emerging discussions as *cognitive simulation architecture*, *multimodal world modeling*, or *generative mental scene construction*.

— these are all facets of the broader cognitive mechanism I originally named ***Visual Thought AGI*** or ***Symbolic AGI***.
